- Whats useful, and whats overkill
- Guest Speaker from Environment Systems

PRESENTATIONS:

Speaker: Alex McIntosh, Head of Operations and Programmes

Trade in Space: Data and use beyond deforestation

WORLD OF COFFEE: ATHENS 2023

We will be at World of Coffee, stand 2-D21. We're showcasing our latest developments and highlighting how we can support importers in proving compliance to EUDR - Visit the team and view your supply chain on Sustainimaps, or test out our mobile data collection tool, Digitrak. Drop by or book time with the team here: <http://bit.ly/WOC23>

CLIMATE VULNERABLE COFFEE

Read about a recent joint study we undertook with the sponsorship of Science and Technology Facilities Council, where we simulated the changes to suitability that arabica growing regions in Colombia are likely to experience over the next 80 years. Read about the study and findings here: <https://bit.ly/Climate-Coffee>

WHATS THE LATEST WITH EUDR?

On Monday 16th May, the EU Council approved the final step for the EU deforestation regulations, bringing us a step closer to requiring evidenced deforestation free imports into the EU. Read our latest take from the EU on the deforestation regulations <https://bit.ly/EUDR-news>
